Password Protect Delete Print OK

- Allows for case assessment for solvability and closure value based on standard or agency defined criteria
- Allows for review dates to be set and provides a list of cases scheduled for review
- Allows for multiple case dispositions and will track dispositions as the case investigation progresses
- Allows for case tasks to be attached to a case and tasks to be assigned for completion

- Allows for investigative information to be documented in a case log that is attached to the case file. Case log entries can be forwarded to a supervisor for approval and will provide record locking for closed cases
- Provides detailed statistical analysis of case data
- Tracks unique characteristics of each case and compares to other cases for incidents that are possibly related
