

Centurion Risk Assessment Software

Software Benefits

- Easy to use
- Can be used by agencies of any size
- Easy to learn
- Automate current processes
- Distribute information to the desktop of other authorized users
- Integrate with other software applications
- Easily installed and implemented

Software Features

- Addresses three of the largest areas of liability for law enforcement
 - Citizen contacts (traffic stop, investigatory stop, etc.)
 - Use of force
 - Pursuits
- Track officer/citizen contacts for bias-based policing
- View early warning indicators for officers possibly engaged in bias-based policing activities

The screenshots illustrate the software's capabilities in managing and analyzing law enforcement incidents. Key features shown include:

- Citizen Contacts Module:** A menu with options like 'Defensive Action', 'Pursuit', and 'Administration'. Below it, a form for entering incident details such as 'Incident #', 'Date', 'Time', 'Reason for Contact', 'Location', and 'Officer'.
- Statistics and Analysis:** A 'Contacts By Hour of Day' bar chart and a 'Race' table. The 'Race' table shows the following data:

Race	# Stops	< 15	16-30	31+
Black	18	3	11	4
Hispanic	43	12	22	9
Middle Eastern, East Indian	58.90%	27.91%	51.16%	20.93%
Native American	1			
White	12			
- Incident Review and Policy:** A 'View Agency Policy' window showing a human figure with anatomical labels for injury assessment (e.g., 'Wrist/Ankle', 'Shoulder', 'Chest').
- User Management:** An 'Enter/Edit User Permissions' window with a grid for assigning permissions to different users.
- Review Process:** A 'View Pending First Level Review' window showing a list of incidents with columns for 'Date', 'Incident #', 'Reason for Stop', 'Result', and 'Officer'.

- Allows for multiple methods of entering data
 - Entered into desktop computer
 - Entered on laptop in field and downloaded to server
 - Entered into hand-held device and downloaded to server
 - Imported from other records management system (citation data, field contact data, etc.)
- Review, track and analyze use of force incidents
- Department policy, state laws and training information (i.e., pressure point diagram) are easily accessible when a use of force incident is being entered
- Provides statistical data on use of force incidents and characteristics
- Review, track and analyze pursuit incidents
- Provides an automated assessment of pursuit based on seriousness of offense and risk factors present
- Provides statistical data on pursuit incidents
- Provides for supervisory review process with up to three levels of supervisory review
